(2) It is hereby further found that compliance with the notice, public rule making procedure, and effective date requirements of the Administrative Procedure Act (Pub. specifically in subparagraph (3) of this paragraph; and

(c) Nothing contained herein shall be construed (1) as affecting or waiving any right, duty, obligation, or liability which has arisen or which, prior to the effective time of the provisions hereof, may arise in connection with any provision of said Plum Order No. 2, or (2) as releasing or extinguishing any violation of said Plum Order No. 2 which has occurred or which, prior to the effective time of the provisions hereof, may occur. (48 Stat. 31, as amended; 7 U. S. C. 601 et seq., 7 CFR, Cum. Supp., 936.1 et seq.)

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Pursuant to section 3 of the Administrative Procedure Act (60 Stat. 237, 238), the following interpretation is issued:

§ 3.2 *Notice to packers and shippers of shelled peanuts.* Investigations by the Food and Drug Administration have shown that a number of interstate shipments of shelled peanuts in bags holding from approximately 100 to 125 pounds each have failed to bear labeling as required by the terms of the Federal Food, Drug, and Cosmetic Act.

(a) The name of the product.
(b) An accurate statement of net weight.

(c) The name and place of business of the packer or distributor.

This information should be conspicuously set forth. It may be printed or stenciled on each bag or, if desired, placed on tags which are securely attached to each bag.

The net weight marked on the bags must be the correct net weight of the peanuts at the time they are delivered to the carrier for interstate shipment. The tare weight of the bag should not be included in the weight declaration. (Sec. 3, Pub. Law 404, 79th Cong., 60 Stat. 238).

Chapter VII—Sugar Rationing Administration, Department of Agriculture

[3d Rev. RO 3¹ Amdt 51]

PART 707—RATIONING OF SUGAR

SUGAR

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

¹ 11 F. R. 177, 14281.

Third Revised Ration Order 3 is amended in the following respects:

1. Section 19.1 is amended to read as follows:

Sec. 19.1 *Provisional allowance for fish (including pickled and cured), shellfish and poultry products—(a) General.* An industrial user may get a provisional allowance of sugar for curing, processing or packing (1) fish, including pickled and cured, (2) shellfish and (3) poultry products.

(b) *How to apply.* (1) A provisional allowance for curing, processing or packing the products listed in paragraph (a) is granted for three-month periods corresponding to the quarterly allotment periods for industrial users. An application for such provisional allowance for any period may be made at any time from the 1st day of the month preceding such period to the end of that period. On or before application for a provisional allowance for these purposes is made, however, the industrial user must file a written report with the Sugar Branch Office with which he is registered stating with respect to each of the products listed in paragraph (a)

(i) The total number of pounds of each products cured, processed or packed by him during 1941,

(ii) The total amount of sugar used by him for such purposes during 1941, (iii) The average amount of sugar which he used per 100 pounds (unprocessed) of that product for such purposes during 1941.

(2) The application must be made on SRA Form R-359 to the Sugar Branch Office with which the industrial user is registered. The applicant must give all the information required by that form for each product for which he applies.

(c) *Action on application.* (1) The Sugar Branch Office shall grant the application if it finds that the applicant is entitled to receive a provisional allowance under this section and that he has made the report required in subparagraph (1) of paragraph (b) and that the applicant has given all the information required by SRA Form R-359.

(2) The amount of the provisional allowance of sugar for use in curing, processing or packing the products listed in paragraph (a) shall be computed, separately for each product listed, in the following way:

(i) For each listed product the number of 100 pound units (unprocessed) which the applicant expects to cure, process or pack from the date of the application to the end of the quarterly period for which application is made is multiplied by 70 per cent of the average number of pounds of sugar which he used per 100 pounds (unprocessed) cured, processed or packed by him during 1941,

(ii) The resulting figures for each listed product are added together and the result is his provisional allowance for curing, processing or packing fish, including pickled and cured, shellfish and poultry products. The Sugar Branch Office shall authorize the issuance of a check to him for the amount of his provisional allowance less any unused bal-

ance of his last provisional allowance of sugar issued for these purposes.

(d) *Restriction on use.* If an industrial user receives a provisional allowance under this section for curing, processing or packing any product listed in paragraph (a) he may use that provisional allowance only for the purpose of producing that product. He may not for any such product use more sugar per 100 pounds (unprocessed) than 70 percent of the average number of pounds of sugar he used per 100 pounds (unprocessed) for that product in 1941. Any sugar or sugar ration evidences issued for use during a quarterly period under the provisions of this section and which are unused at the end of that quarterly period may not be used during any other quarterly period until an application on SRA Form R-359 for permission to use such sugar or sugar ration evidences has been granted.

(e) *Records and reports.* An industrial user who, during a calendar month, has sugar for curing, processing or packing any product listed in paragraph (a) must, before the sixteenth day of the following month, file with the Sugar Branch Office with which he is registered, a report on SRA Form R-359A giving all of the information required by that form. If the industrial user uses sugar in more than one plant for the purposes covered by this section he must file a report on SRA Form R-359A for each plant separately as well as a consolidated report for all of his plants. He must keep a copy of each report at his principal business office as long as this order remains effective.

2. Section 19.2 (b) is amended to read as follows:

(b) *How to apply.* A provisional allowance to cure, process or pack the meat products listed in the supplement to this order is granted for three-month periods corresponding to the quarterly allotment periods for industrial users. An application for such provisional allowance for any period may be made at any time from the 1st day of the month preceding such period to the end of that period. The application must be made on SRA Form R-359 to the Sugar Branch Office with which the industrial user is registered. The applicant must give all of the information required by that form separately stated for each kind of meat product he will cure, process or pack.

3. Section 19.2 (c) (1) is amended to read as follows:

(1) The Sugar Branch Office shall grant the application if it finds that the applicant is entitled to receive a provisional allowance for curing, processing, or packing meat and that the applicant has given the information required by SRA Form R-359.

4. Section 19.2 (c) (2), (ii) is amended to read as follows:

(ii) The resulting figures for each kind of product are added together and the result is his provisional allowance for curing, processing or packing meat. The Sugar Branch Office shall authorize the issuance to him of a check for the amount of his provisional allowance less any un-

used balance of his last provisional allowance of sugar issued for these purposes.

5. Section 19.2 (d) (2) (ii) is amended by substituting the words "Sugar Rationing Administration, Department of Agriculture" for the words "Office of Price Administration" wherever they appear thereon.

6. Section 19.2 (d) is amended by adding a new subparagraph (3) to read as follows:

(3) Any sugar or sugar ration evidences issued for use during a quarterly period under the provisions of this section and which are unused at the end of that quarterly period may not be used during any other quarterly period until an application on SRA Form R-359 for permission to use such sugar or sugar ration evidences has been granted.

7. Section 19.2 (e) is amended to read as follows:

(iii) The total number of pounds of sugar used by him in 1941 in packing each product;

(iv) The average amount of sugar which he used per pound for each product during 1941. (The average amount of sugar is determined by dividing the number obtained in (iii) by the sum of the numbers obtained in (i) and (ii).)

(2) The application must be made on SRA Form R-359 to the Sugar Branch Office with which the industrial user is registered. The applicant must give all of the information required by that form. In addition, the applicant must state the total number of pounds of each product to be packed during the period covered by the application. (ii) The resulting figures for each listed product are added together and the result is his provisional allowance for pickling cucumbers, cauliflower, onions and watermelon. The Sugar Branch Office shall authorize the issuance to him of a check for the amount of his provisional allowance less any unused balance of his

last provisional allowance of sugar issued for these purposes.

(d) *Restriction on use.* If an industrial user receives a provisional allowance under this section for pickling any product listed in paragraph (a) he may use that provisional allowance only for the purpose of pickling that product. He may not use for any such product more sugar per pound than the average number of pounds of sugar he used per pound for that product in 1941. Any sugar or sugar ration evidences issued for use during a quarterly period under the provisions of this section and which are unused at the end of that quarterly period may not be used during any other quarterly period until an application on SRA Form R-359 for permission to use such sugar or sugar ration evidences has been granted.

2. An industrial user may, for each case of 24 No. 2 cans (or equivalent) of soup which the applicant will bottle or can during the quarter, obtain and use 100 percent of his average use of sugar for each case of 24 No. 2 cans (or equivalent) during 1941.

3. An industrial user may obtain for each case of 24 No. 2½ cans (or equivalent) during his packing season, a provisional allowance of sugar for canning or bottling fruits in amounts equal to the higher of the following:

(a) 100 percent of the average number of pounds of sugar which he used per case of 24 No. 2½ cans (or equivalent) during 1941, or

(b) The amount per case specified in a table in the supplement to the order.

4. An industrial user may, for each case of 24 No. 2 cans (or equivalent) of each kind of vegetable, including spiced and pickled, as set forth in the table in the supplement to the order, which the applicant will can or bottle during the quarter, obtain and use the increased amount of sugar per case for that kind of vegetable, as specified in the table.

5. An industrial user may, for each pound of cucumbers, cauliflower, onions or watermelon which he will pickle during a quarter, obtain and use 100 percent of the average number of pounds of sugar which he used per pound of that product during 1941.

6. An industrial user who used provisional allowance sugar in processing a particular product in more than one plant must file a report on SRA Form R-359-A of his use of sugar for each plant separately as well as a consolidated report for all of his plants.

7. Other clarifying and technical changes are made by this amendment, such as changing references to District Offices to read Sugar Branch Offices, changing designations of forms R-359 and R-359A from OPA Forms to SRA forms, making it clear that a product which is being processed with sugar granted under the provisional allowance provisions may not be transferred until such product is completely processed, and that a provisional allowance is not granted for making jams, jellies, preserves, marmalades, fruit butter, toppings, fruit parfaits or fountain fruit.

Reasons for change. Under present marketing conditions, it is not feasible for canners to pack large quantities of fruit in water or in light sirup since the

outlets for such packs are declining. It is felt, therefore, that since sugar allocations have increased this year and since it is expected that the 1947 pack will be smaller than the record 1946 pack, that packers of fruit should be permitted to utilize their normal 1941 quantity of sugar per case and that those packers, who have an abnormally low 1941 use, or no 1941 use at all, should be permitted to utilize sufficient sugar per case to enable them to pack their fruit so that it will be salable under present conditions. This amendment, therefore, provides that an industrial user may now obtain for canning or bottling fruit, 100 percent of his 1941 use of sugar per case for each type of fruit or 95 percent of the industry average use of sugar per case for that type of fruit.

At the same time, provisional allowance users may now obtain increased amounts of sugar for dried beans, frozen fruits and canned vegetables, since this increase is in line with other proposed provisional allowance increases and such amounts have been granted previously during rationing.

For some time, picklers have been encountering difficulties in finding outlets for large stocks of cucumbers which have been held in brine. At the present time, dill and sour pickles are apparently flooding the market and it is impossible for picklers to attempt to pack any more dill or sour pickles since at present there is no market for this type of pickle unless sweet pickles can be sold at the same time. As a result, it is impossible for the picklers to empty their vats which now contain large stocks of cucumbers in brine and it will be exceedingly difficult for the growers to market the cucumber crop during the coming months unless some relief is forthcoming in order to alleviate the present situation. At the present time, sugar for processing pickles is granted on an allotment basis and the amount obtainable for such purposes is limited by 75% of the amount used for such purpose in 1941. Persons who did not use sugar for processing pickles in 1941 may not, under present provisions, obtain a base for such purpose except under the provisions of Revised General Ration Order 18 and General Ration Order 19. This amendment, therefore, permits an industrial user to obtain a provisional allowance of sugar for pickling cucumbers, cauliflower, onions or watermelon in an amount which will permit him to use 100 percent of the average number of pounds of sugar which he used per pound for that product during 1941. Since we are granting a provisional allowance for pickling these particular items, it is felt advisable to permit industrial users to obtain a provisional allowance for pickling or spicing any of the vegetables for which provisional allowances are granted. These vegetables would include pickled beets and sweet-sour cabbage.

At the time the base period (August 1, 1943 through June 30, 1944) for determining the amount of provisional allowance for canning or bottling soup was established, packers of soup were restricted by M-81 (tin order) from pack-

RULES AND REGULATIONS

ing ready to eat soups. Many packers, now that the tin restrictions have been lifted, have either started to pack this item or to resume packing of such soups. This amendment establishes the base period use for canning soup as the year 1941, which will permit many packers to obtain a provisional allowance for many kinds of soups for which there is no historic usage from August 1, 1943 through June 30, 1944.

Industrial users who use provisional allowance sugar in processing a product in more than one plant are now required to file a report on SRA Form R-359A on their use of sugar for each plant separately as well as a consolidated report for all of their plants since otherwise Sugar Branch Offices located in states other than the one in which the industrial user is registered are unable to determine whether or not the provisional allowance sugar is being used for the purpose for which it was granted and at the rate permitted. A greater knowledge of the operations of such users and a better control of the use of sugar granted under provisional allowance provisions can be accomplished if production reports are given for each plant separately.

SUBPART A—THE ADMINISTRATOR

§ 1305.510 *Authority of the Price Administrator; directing and approval powers of the President and other Federal agencies with respect to price control and rationing.* The Office of Price Administration, under the direction of a Price Administrator, was created by the Emergency Price Control Act of 1942, as amended, with basic authority to establish maximum prices for commodities (including services in connection with commodities) and maximum rents for defense area housing accommodations.

The act specifies legal standards governing the exercise of this authority, and grants supplementary powers, including the power to delegate authority, necessary for its administration and enforcement. Regulations establishing maximum prices and maximum rents are subject to review by the Emergency Court of Appeals in accordance with procedures prescribed by the act.

(a) The Stabilization Act of 1942, as amended, granted broad economic stabilization powers to the President, including authority to prescribe policies governing the Office of Price Administration and other agencies. The President has delegated to the Office of Economic Stabilization in the Office of War Mobilization and Reconversion this power to issue directives on policy.

(b) With respect to agricultural commodities and food or feed products derived in whole or substantial part therefrom, actions by the Price Administrator must be previously approved in writing by the Secretary of Agriculture. In addition (after September 1, 1946) no maximum price may apply to any such commodity unless the Secretary has certified that it is in short supply. The Secretary has authority to make binding recommendations to the Price Administrator for the adjustment of maximum prices on such commodities which the Secretary determines are not important in relation to business costs or living costs. Whenever the Secretary determines that such a commodity from which control has been removed is in short supply, and should be subjected to price control, he may, with the written consent of the Price Decontrol Board (see below), make a binding recommendation to the Price Administrator for the reestablishment of maximum prices for that commodity.

(c) The Price Decontrol Board was established by the Emergency Price Control Act (as amended in July 1946 by the Price Control Extension Act of 1946) to act upon the petitions of industry advisory committees for the decontrol of commodities, where such petitions have been presented to and denied by the Price Administrator, in the case of nonagricultural commodities and food or feed products derived in whole or substantial part therefrom. With respect to certain commodities, from which price control was removed by Congress until August 21, 1946, and for which the Board, pursuant to its powers under the amended act, did not, prior to August 21, 1946, order reconrol, the Board has authority to direct the Administrator to reestablish price controls.

(d) The rationing authority of OPA is derived from delegations of the President's power to allocate materials and facilities under the Second War Powers Act of 1942. This power has been delegated through the War Production Board (succeeded by Civilian Production Administration) in the case of other commodities.

(e) The Price Administrator is authorized by the Emergency Price Control Act, as amended, to make subsidy payments under certain conditions. Funds have not been provided for the direct exercise

RULES AND REGULATIONS

of this power by the Administrator. In the case of commodities designated by the President as strategic or critical, the subsidy powers granted by the act must be exercised by or through the Reconstruction Finance Corporation. Where the Reconstruction Finance Corporation conducts subsidy programs under this authority, the Price Administrator co-operates in the administration of related price controls. The Corporation, like the Price Administrator, is subject to the directive powers of the Office of Economic Stabilization.

(f) All functions of the Price Administrator are vested in the Temporary Controls Administrator by Executive Order 9809.

(g) All delegations of authority made by or under the authority of the Price Administrator or by any other authorized official of the Office of Price Administration, and which were in effect on December 12, 1946, were adopted, ratified, confirmed, and validated by the Temporary Controls Administrator in OTC Regulation 2 (11 F. R. 14704) and by Executive Order 9809, and remain in full force and effect until they expire by their terms or are revoked or amended.

(h) Delegation of regulatory authority shall be made by a general order or as part of another official document. Re-delegation of regulatory authority shall be made by a delegation order approved, and signed by the person to whom the power is delegated and filed with the executive officer of the appropriate operating department or office.

(i) The Temporary Controls Administrator delegates to the Commissioner of Price Administration administrative authority to act for the Administrator in all matters relating to the Office of Price Administration except those heretofore specifically reserved to the Price Administrator which were transferred to the Temporary Controls Administrator by Executive Order 9809. Delegation or re-delegation of administrative authority by the Commissioner of Price Administration shall be made by publication in the OPA Manual in accordance with the provisions of Administrative Order No. 90, revised.

(j) The office of the Temporary Controls Administrator will notify the office of the Secretary, Office of Price Administration, Office of Temporary Controls, when an appointment of Acting Administrator is made, stating the time during which the appointment is to be effective.

(k) Delegations of regulatory authority shall be published in the FEDERAL REGISTER.

SUBPART E—DELEGATIONS OF FINAL AUTHORITY

§ 1305.760 *Nature of delegations.* In addition to the general functions exercised by national and field offices described above, certain functions are exercised by virtue of delegations of final authority under OPA regulations or orders. Delegations to field offices may be made directly by regulation or order or may be made pursuant to conditions set forth in the regulation or order. Where authorized by regulation or order, redelegation of authority may be made to a subordinate level of field offices by order of the chief executive officer of the officer receiving the delegation. Specific delegations and redelegations made pursuant to price, rationing and rent regulations and orders are described below.

§ 1305.761 *Price delegations to continental offices.* The following information is given for each delegation of authority:

(a) Regulation or order number, section containing authority delegated, and the FEDERAL REGISTER citations.

(b) The title and/or a brief description of the authority delegated.

(c) An indication as to whether the regional administrator can redelegate authority to directors in branch offices (formerly district offices)

(d) The branch offices (formerly district offices) to which authority has been delegated by the regional offices. As listed below (e) each of the eight regions is designated by a Roman numeral and each branch office (formerly district offices) by an Arabic numeral. These numbers are used in place of the names of the regional and branch offices in showing redelegations. For example "II-1, 2" indicates that the specific authority has redelegated by the New York regional office to the Baltimore and Newark branch offices (formerly district offices) only. "III-All" indicates that the Cleveland regional office has redelegated the authority to all of the branch offices (formerly district offices) in Region III, "IV-None" indicates that the Atlanta regional office has not delegated the authority to any of the branch offices in Region IV

Applications must be made to SBO with which applicant is registered. Temporary emergency adjustments. The Regional Administrator has authority to grant temporary emergency adjustments to industrial users whose applications must be decided by NO. This authority is to be invoked only when the industrial user would suffer irreparable injury as a result of the time required by NO in reaching a decision. Regional Administrator may make such an emergency adjustment for a period not exceeding one month. He must immediately forward the application file and notify NO of his action. This authority applies also to institutional users. SBO has authority to deny any industrial user application for which there is no written policy. Application by a registered industrial user to shift his use of sugar from one class of products or uses to another where circumstances beyond his control prevent him from continuing to make products or uses of the former class. e. Application for provisional allowances based on prorating formula. SBO cannot compute provisional allowance for an applicant who did not make his product before rationing. In such cases the NO will set the quantity of sugar the applicant may use per unit of production, and will authorize the SBO to grant provisional allowances to the user for that particular quantity of sugar per unit. SBO has unrestricted authority to decide the following applications: a. Application by a new industrial user to register and obtain allotments of sugar, or a registered industrial user to obtain additional allotments, for home economics classes. b. Application by a new industrial user to register and establish base, or a registered industrial user to obtain additional allotments to produce preparations he needs to prevent substantial damage to his crops from insects. c. Application for adjustment of excess inventory charged to an industrial user resulting from overconsumption of ration evidences to him, where he acted in reliance on the amount of the issuance without knowing that it was excessive and would suffer great hardship were no adjustment made. e. Application by a new industrial user to register if he wants sugar for the purpose for which provisional allowances are granted. After he is registered, applicant may apply for provisional allowances. If he will make a product for which a fixed amount of sugar per unit of production is set out in 2d Rev. RO 3, SBO will act. If applicant will make a product for which a provisional allowance is determined according to amount of sugar he used in producing it in the past, the newly registered user's first application for a provisional allowance must be referred to national office. Exception: In the case of canned or bottled fruits, authority is delegated to SBO to establish 1941 usage on a "per case" basis for new users.	Sugar Branch Office Director is authorized to act. STANDARD OF FILL OF CONTAINER AND DEFINITION AND STANDARD OF IDENTITY FOR CANNED OYSTERS

NOTICE OF HEARING

In the matter of proposals to amend the standard of fill of container and to promulgate regulations fixing and establishing a definition and standard of identity for canned oysters.

Notice is hereby given that the Administrator of the Federal Security Agency, in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055; 21 U. S. C. 341, 371) upon application of a substantial portion of the interested industry, and upon his own initiative, will hold a public hearing commencing at 10:00 a. m. eastern daylight saving time, July 10, 1947, in room 5544, Federal Security Building, Independence Avenue and Fourth Street SW., Washington, D. C., and at such other places outside the city of Washington, D. C., to which the same may be adjourned on authorization of the Administrator, upon applicants' proposal that the standard of fill of container for canned oysters (21 CFR, 1944 Supp., 36.6) be amended to reduce the drained weight now required, and upon proposals by the Administrator that a regulation be promulgated fixing and establishing a definition and standard of identity for canned oysters, and to amend the standard of fill of container for canned oysters so that it is applicable to all canned oysters as defined in the definition and standard of identity for canned oysters.

For the purpose of giving general notice of the subject and issues involved, and for giving direction to the hearing, a proposed definition and standard of identity for canned oysters is:

§ 36.5 *Canned oysters; identity; label statement of optional ingredients.* (a) Canned oysters is the food prepared from one or any mixture of two or more of the optional oyster ingredients specified in paragraph (b) of this section and a packing medium. The packing medium is water, or the liquid draining from oysters before or during processing, or any mixture of water and such liquid. The food may be seasoned with salt and is sealed in containers and so processed by heat as to prevent spoilage.

(b) The optional oyster ingredients referred to in paragraph (a) of this section are: Whole oysters, diced oysters, sliced oysters, pieces of oysters, prepared from live oysters of the species *Ostrea gigas*, *Ostrea lurida*, or *Ostrea virginica*. Each form of unit of each species is an optional oyster ingredient. The oysters are removed from their shells and washed, and may be blanched. Shell oysters may be steamed to facilitate removal from the shell.

(c) The names of the optional oyster ingredients are:

(1) Where the oysters are whole, the name is "Oysters" or "Cove Oysters" when such oysters are the species *Ostrea virginica*; "Pacific Oysters" when of the species *Ostrea gigas*; and "Olympia Oysters" when of the species *Ostrea lurida*.

(2) When the oysters are not whole oysters, the name of the optional oyster ingredient is the name by which the oysters of the species are designated in subparagraph (1) of this paragraph, preceded by the word "Diced" if the units are diced oysters, or by the word "Sliced" if the units are sliced oysters, or by the words "Pieces of" if the units are pieces of oysters.

(d) The name prescribed is the name or names of the optional oyster ingredients used as given in paragraph (c) of this section.

For the purpose of giving notice on the subject and issues involved and for giving direction to the hearing, a proposed amended standard of fill of container for canned oysters is:

§ 36.6 *Canned oysters; fill of container; label statement of substandard fill.* (a) The standard of fill of container for canned oysters is a fill such that the drained weight of the oysters taken from each container is not less than -- percent of the water capacity of the container. (The actual percent of fill to be fixed on the basis of evidence taken at the hearing.)

(b) Water capacity of containers is determined by the general method pro-

vided in § 10.1 (a) of this chapter (21 CFR, Cum. Supp., 10.1)

(c) Drained weight is determined by the following method: Keep the unopened canned oyster container at a temperature of not less than 68° or more than 95° Fahrenheit for at least 12 hours immediately preceding the determination. After opening, tilt the container so as to distribute its contents evenly over the meshes of a circular sieve which has been previously weighed. The diameter of the sieve is 8 inches if the quantity of the contents of the container is less than 3 pounds, and 12 inches if such quantity is 3 pounds or more. The bottom of the sieve is woven-wire cloth which complies with the specifications for such cloth set forth under "2380 Micron (No. 8)" in Table I of "Standard Specifications for Sieves" published March 1, 1940, in L. C. 584 of the U. S. Department of Commerce, National Bureau of Standards. Without shifting the material on the sieve, so incline the sieve as to facilitate drainage. Two minutes from the time drainage begins, weigh the sieve and the drained oysters. The weight so found, less the weight of the sieve shall be considered to be the drained weight of the oysters.

(d) If canned oysters fall below the standard of fill of container prescribed in paragraph (a) of this section, the label shall bear the general statement of substandard fill specified in § 10.2 (b) of this chapter (21 CFR, Cum. Supp., 10.2) in the manner and form therein specified, followed by the statement, "A can of this size should contain ---- oz. of oysters. This can contains only ---- oz." the blanks being filled in with the applicable figures.

An examiner will be designated as presiding officer to conduct the hearing in the place of the Administrator, with full authority to administer oaths and affirmations and to do all other things appropriate to the conduct of the hearing. The presiding officer is required to certify the entire record of the proceedings to the Administrator for initial decision.

The hearing will be conducted in accordance with the rules of practice provided therefor.

At the hearing evidence will be restricted to testimony and exhibits that are relevant and material to the matter contained in the proposals.

The proposals are subject to adoption, rejection, amendment, or modification by the Administrator, in whole or in part, as the evidence adduced at the hearing may require.

EXPEDITER

[C-38]

HARRY MILLMAN AND SULLIVAN-FOSTER,
INC.

CONSENT ORDER

Harry Millman who resides at 242 Rounds Street, New Bedford, Massachusetts, filed an application with the Federal Housing Administration for permission to construct a dwelling at Slocumb Road, North Dartmouth, Massachusetts. Authorization, based upon the application and plans submitted showing a floor area of under 1500 square feet, was issued February 13, 1947. Sometime thereafter, Harry Millman and Sullivan-Foster, Inc., of New Bedford, Massachusetts, the contractor, began construction under this authorization of a building to contain about 2800 square feet with space for two bathrooms and two lavatories, together with a garage containing one full bathroom. This construction was based upon a different plan from that submitted with the application for authorization. The construction of a building in excess of the limitations and requirements of Housing Permit Regulation under which the authorization was issued constitutes a violation of Veterans' Housing Program Order 1 and HPR.

Harry Millman and Sullivan-Foster, Inc., admit the violations as charged and consent to the issuance of this order.

Wherefore, upon the agreement and consent of Harry Millman and Sullivan-Foster, Inc., the Regional Compliance Director, and the Regional Compliance Attorney, and upon the approval of the Compliance Commissioner, *It is hereby ordered, That:*

(a) The temporary suspension orders issued by the Office of the Housing Expediter by telegram dated April 11, 1947, addressed to Harry Millman and also to Sullivan-Foster, Inc., are hereby revoked.

(b) Neither Harry Millman nor Sullivan-Foster, Inc., their successors or assigns, nor any other person shall do any further construction on the project located on Slocumb Road, North Dartmouth, Massachusetts, without specific authorization in writing from the Office of the Housing Expediter.

(c) The provision of paragraph (b) above shall not apply to work specifically authorized in writing by the Office of the Housing Expediter under Serial No. 1-1-4871, dated May 13, 1947, which work was authorized to prevent deterioration of materials already incorporated into the structure.

(d) Harry Millman and Sullivan-Foster, Inc., shall refer to this order in any application or appeal which they may file with the Office of the Housing Expediter or any other Federal Agency to do any further construction on this project.

(e) Nothing contained in this order shall be deemed to relieve Harry Millman and Sullivan-Foster, Inc., their successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the Office of the Housing Expediter, except insofar as the same may be inconsistent with the provisions hereof.

Issued this 5th day of June 1947.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 54-75, 70-726]

COMMONWEALTH & SOUTHERN CORP.
(DELAWARE)

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 28th day of May 1947.

The Commonwealth & Southern Corporation ("Commonwealth") a registered holding company, having filed a declaration pursuant to the Public Utility Holding Company Act of 1935, particularly section 12 (c) thereof and Rule U-46 thereunder, regarding the proposed payment of a dividend of \$3.00 per share, or an aggregate of \$4,323,741 on the outstanding shares of its preferred stock, payable on the 28th day after the date of the order of the Commission permitting the payment of such dividend or on July 1, 1947, whichever date is later, to stockholders of record at the close of business on the 10th day after the date of such order (or if such 10th day is not a business day, the first business day following such 10th day) or on June 10, 1947, whichever date is the latter; and

The Commission having heretofore instituted proceedings under sections 11 (b) (1) and 11 (b) (2) of the act with respect to Commonwealth and its subsidiaries; and

Commonwealth having filed a plan for compliance with such sections of the act, providing, among other things, for the liquidation of Commonwealth; and

Commonwealth having stated in the instant declaration that "The Board * * * recognizes that, in view of the pending proceedings, the 'Earned Surplus' account may be so qualified that, under the rules and practice of the Commission, payment of said dividend is subject to the requirement of Commission authorization under the provisions of section 12 (c) of the act and Rule U-46 in spite of the fact that, as authorized by section 34 of the Delaware General Corporation Law, the source of payment of such dividend under such Law is Commonwealth's net profits for the current and preceding fiscal years." and

The instant declaration having been filed on May 13, 1947, and notice of said

filing having been duly given in the form and manner prescribed by Rule U-23 promulgated pursuant to said act, and the Commission not having received a request for a hearing with respect to said declaration within the period specified in the said notice, or otherwise, and not having ordered a hearing thereon; and

The Commission deeming that it would not be necessary or appropriate to deny effectiveness to the declaration under the standards of section 12 (c) of the act and Rule U-46 if it should be found that the proposed payment were to be made out of capital and that, therefore, it is unnecessary for the Commission to determine whether said proposed payment is being made out of capital; and

The Commission therefore deeming it appropriate in the public interest and in the interest of investors and consumers to permit said declaration to become effective insofar as section 12 (c) and Rule U-46 are applicable to the proposed payment; and

Commonwealth having requested that the Commission's order be issued herein on or before May 29, 1947, and become effective forthwith so that Commonwealth may pay the proposed dividend not later than July 1, 1947, and the Commission deeming it appropriate to grant such requests:

It is hereby ordered, Pursuant to Rule U-23 and the applicable provisions of the act and subject to the terms and conditions prescribed in Rule U-24, that the aforesaid declaration be, and the same hereby is, permitted to become effective forthwith: Provided, however That this order shall not be construed as a determination that such dividend payment is or is not taxable to the recipient pursuant to the provisions of the Internal Revenue Code: *And provided further, That* Commonwealth accompany the dividend checks with a statement to the effect (1) that Commonwealth filed the declaration regarding the proposed dividend payment pursuant to section 12 (c) and Rule U-46 by reason of its uncertainty as to whether the "Earned Surplus" account may be so qualified that, under the rules and practice of the Commission, payment, of the proposed dividend is subject to the requirement of Commission authorization under the act and the rules thereunder and that the Commission permitted the declaration to become effective without determining whether the proposed payment is being made out of capital and (2) that the Commission's action in permitting the declaration to become effective should not be construed as a determination that such dividend payment is or is not taxable to the recipient pursuant to the provisions of the Internal Revenue Code.

By the Commission.

ORVAL L. DuBOIS,
Secretary.
